PROFESSIONAL SUMMARY

Senior Product Manager with a strong technical foundation in Bioinformatics and 8 years across management consulting and in-house product ownership. Proven track record of operating discovery and experimentation machines to shorten release cycles, define North Star metrics, and drive measurable outcomes - including scaling a retail platform to 73 countries and improving platform NPS from ~5 to ~7.8. Mentored and structured product teams across the organisation; built alignment across distributed engineering and business units.

WORK EXPERIENCE

Senior Product Manager

April 2022 – Present

BMW Group, Lisbon / Munich

Owned product strategy across a 3-product portfolio - a unified retail platform live across 73 countries, a global communications platform for 4 brands, and an agentic AI assistant for dealers (in inception) - coordinating priorities across multiple engineering teams and business stakeholders. Structured product teams and mentored junior PMs across the organisation.

- Scaled platform rollout from ~20 to 73 countries, supporting ~4k MAU across enterprise dealership networks.
- Defined and owned the North Star metric (Time to Value), influencing domain-wide OKRs and guiding prioritisation across the full sales journey.
- Built a continuous discovery loop across 700+ dealership agents in 3 markets - surfaced critical pain points adopted across product teams, contributing to NPS improvement from ~5 to ~7.8 over 2 years.
- Shortened conceptual lead times by implementing rapid experimentation and clear, data-informed hypothesis testing.
- Led a high-risk cross-continental product transition (Retailer Hub): designed a 4-phase handover plan with reprioritisation and resource alignment that ensured zero planned delivery failures for the remainder of the year.
- Leadership: led product craft across 6 PMs over 2 years - structured 1:1 coaching, co-defined growth frameworks, and founded cross-PM knowledge-sharing sessions whose practices were adopted by 4 other product teams.

Tech Senior Consultant

August 2018 – April 2022

Deloitte, Lisbon

Designed and owned functional and technical solutions for Low-Code/No-Code projects from Discovery to Delivery. Worked across automotive, public health, and telecommunications sectors.

- OpenNL (2022) - national COVID testing platform: Joined the final scale-up phase under extreme time and political pressure; supported requirements coordination and client alignment as the platform reached 1,000+ test locations nationally.
- Unitel (2021) Self-service platform for Angola's largest telecom provider: Led infrastructure migration and platform upgrade with zero service disruption.
- NOS Self-Service App (2019 – 2020) Mobile-first self-service app for NOS, one of Portugal's largest telecoms.

EDUCATION

MSc in Bioinformatics and Computational Biology

Jul 2018

Faculty of Sciences, University of Lisbon

SKILLS

Product Management: Product strategy, Strategic product roadmapping, Product vision development, Agile methodologies, User research, Rapid experimentation, Data-driven discovery, Stakeholder management, Cross-functional leadership, OKR definition, Platform scaling

Technical: TypeScript, Supabase, No-code prototyping (Lovable, OutSystems), Vite, Agile / Scrum

Domain: Women's health, Reproductive health, Bioinformatics, Clinical foundations (BSc/MSc Biology)

Languages: Portuguese, English

SIDE PROJECTS

BookVault

Full-stack digital library with AI-powered metadata extraction from EPUB/PDF, social reading features, and Kobo e-reader integration.

- React 18 · TypeScript · Supabase · OpenAI · Tailwind CSS
- github.com/tanmald/bookvault
- bookvault-kappa.vercel.app

PlateCheck

AI nutrition adherence tracker: snap a meal photo, get an instant 0–100 adherence score against your nutrition plan using GPT-4 Vision.

- React 18 · TypeScript · Supabase · GPT-4 Vision · Tailwind CSS
- github.com/tanmald/plate-check
- platecheck.vercel.app

RECOMMENDATIONS

Anna Kalmar

Direct Manager, Senior Product Manager, BMW Group

"She is a true product visionary with a strong focus on the end customer. Tania approaches topics strategically, always keeping the long-term vision in mind, yet she has the rare ability to translate that vision into clear, actionable tasks for the development team. Her skill in bridging the gap between business requirements and technical implementation is exceptional."

Diogo Henriques

Partner, Deloitte

"What stood out from the very beginning was her strong sense of purpose and commitment — she always showed up with a clear drive to make things better, for the team and for the client. Her delivery was consistently top-notch: structured, thoughtful, and always with an eye on both detail and the bigger picture."
